TUFYAL AHMMED

AI-Augmented QA Engineer | SDET | Automation • Performance • Mobile • API

Dhaka, Bangladesh | +8801679560509 | ahmmedtufyal1@gmail.com
LinkedIn | GitHub

PERSONAL PROFILE

Results-driven QA Engineer / SDET with 4+ years of experience designing scalable automation frameworks across web, mobile, and API platforms. Proven track record of accelerating release cycles by combining traditional test engineering with AI-assisted workflows (GitHub Copilot, Claude, MCP integrations). Recently expanded expertise into k6 performance testing to deliver end-to-end quality—from functional coverage to load resilience. Passionate about building intelligent, maintainable test ecosystems that ship confidence, not just code.

WORK EXPERIENCE

Senior QA Engineer | Silent Hawk LDA

January 2026 – Present

- Joined during the early stage of the project and contributed to establishing the QA function and team structure from the ground up.
- Helped define and implement QA processes, testing standards, and best practices across the project.
- Contributed to the development of the test automation strategy, framework approach, and overall QA roadmap.
- Collaborated with developers and stakeholders to integrate quality practices throughout the software development lifecycle.

Software QA Engineer | Portonics Limited

September 2024 – January 2026

- Owned end-to-end QA for a multi-million-user telecom super app, covering mobile, web, CMS, and API layers.
- Designed and maintained UI and API automation suites, reducing regression cycle time and improving release confidence.
- Pioneered Appium MCP Server integration—enabling AI models to interact directly with the mobile automation framework, cutting scripting effort and accelerating test generation.
- Introduced AI-assisted QA workflows using GitHub Copilot and Claude AI to auto-generate test cases, automation scripts, and structured Jira bug reports from BRS/FRS and Figma designs.
- Conducted performance analysis via Kibana log inspection to identify bottlenecks and validate system behavior under real user load.
- Integrated k6 performance testing into the QA workflow to extend coverage from functional testing to load and stress validation.
- Partnered with developers, PMs, and clients during UAT and grooming sessions to translate business requirements into testable acceptance criteria.
- Projects: Robi/Airtel Single App (Android, iOS, API) and Singer Bangladesh eCommerce Platform.

Software Development Engineer in Test (SDET) | MetLife Bangladesh

September 2023 – September 2024

- Led requirement analysis, test planning, and test strategy design for enterprise-grade insurance products serving thousands of daily users.
- Delivered end-to-end test coverage for MetLife's web and mobile insurance platforms, ensuring compliance with strict enterprise acceptance criteria.
- Built and scaled a hybrid automation framework using Java, Selenium, TestNG, JUnit-4, and Cucumber/Gherkin, applying POM and BDD best practices.
- Engineered API automation with Rest Assured, validating critical policy, claims, and customer data flows.
- Orchestrated cloud-based test execution on Perfecto via Azure DevOps pipelines, enabling parallel cross-device testing and faster feedback loops.
- Collaborated with cross-functional teams to convert complex insurance requirements into structured test plans, reducing production defects and improving release predictability.

SQA Engineer | Quality Up Services

February 2022 – August 2023

- Delivered QA for multiple client projects across web and Android platforms, owning the full test lifecycle from requirement analysis to release sign-off.
- Built automation suites in Java (Selenium, TestNG, JUnit-4, Cucumber) and JavaScript (Cypress, Mocha).
- Executed API testing, manual and automated, using Postman, Rest Assured, and Karate DSL.
- Contributed to load & performance testing with JMeter and Karate Gatling, identifying scalability limits before production rollout.
- Authored detailed test suites, defect reports, and regression packs, becoming a go-to QA resource for multiple concurrent client accounts.

KEY SKILLS

Manual Testing: Requirement analysis, test planning, test case design, execution, evaluation, and reporting.

Automation – Web/Mobile: Selenium WebDriver, Cypress, Appium, Espresso, Playwright

API Testing: Postman, Rest Assured, Karate DSL

Performance Testing: k6, JMeter, Karate Gatling

AI-Augmented QA: GitHub Copilot, Claude AI, OpenAI Codex, Appium MCP Server, Prompt Engineering

Frameworks & Patterns: POM, BDD (Cucumber/Gherkin, Behave), TDD, Data-Driven

Programming Languages: Java, JavaScript, TypeScript, Python

CI/CD & DevOps: Azure DevOps, Perfecto Cloud, Git, GitHub, Bitbucket

Reporting & Tracking: Allure, Extent Reports, Jira, Azure Boards, ZenHub

Database: MySQL

PROJECTS & PORTFOLIO

- Web Automation with Selenium, Cucumber, and Java
- Web Automation with Cypress, Cucumber, and Allure Reports
- Android App Automation with Appium
- API Automation with Rest Assured (Java)
- API Automation with Karate DSL
- Performance Testing with JMeter and Karate Gatling
- Performance Testing with k6 — Load, stress & spike testing scripts for REST APIs

EDUCATION

Bachelor of Science in Computer Science and Engineering
Daffodil International University, Dhaka, Bangladesh | 2021

Higher Secondary Certificate (H.S.C) in Science
Agricultural University College, Mymensingh | 2013

Secondary School Certificate (S.S.C) in Science
Bhaluka Pilot High School, Bhaluka | 2011
